DYLAN LARGENT

Dallas, OR 97338 • (971) 283-6219 • dylanveneta31@gmail.com

Active Top Secret Clearance (exceeds Secret requirement) • Willing to Relocate to Coronado, CA

SUMMARY

Intelligence analyst with the Air National Guard, working daily in controlled-information environments where data entry accuracy and procedural compliance are the standard rather than the goal. Enters, organizes, and maintains records across multiple software systems; produces formal documentation to prescribed formats; and prepares material for review, approval, and distribution under strict handling rules. Recent graduate of an eight-month formal military technical training pipeline, familiar from the student side with structured curriculum, lesson plans, and testing progression. Holds an active Top Secret clearance adjudicated through a federal background investigation.

CORE SKILLS

- **Data Entry & Records:** Accurate entry and maintenance of records in software systems and databases; verification before finalization
- **Documentation:** Formal written products to prescribed formats; preparation of material for review and approval
- **Software:** Microsoft Word, Excel (sorting, filtering, pivot tables), PowerPoint, Outlook; database entry tools
- **Procedural Compliance:** Work governed by strict handling, storage, and dissemination rules; audit-ready documentation
- **Training Environment:** Graduate of Air Force BMT and an eight-month formal technical training pipeline
- **Clearance:** Active Top Secret, adjudicated through federal background investigation; currently maintained

EXPERIENCE

Intelligence Analyst | Oregon Air National Guard | Portland, OR | **March 2025 – Present**

- Enter, organize, and maintain records across multiple software systems and databases; verify accuracy and resolve discrepancies before records are finalized.
- Build and maintain Excel workbooks to sort, filter, tabulate, and track data sets, converting unstructured inputs into organized, searchable records.
- Produce written products and PowerPoint materials to prescribed formats; prepare documentation for review, approval, and distribution.
- Prepare and handle classified material under strict procedural controls governing handling, storage, and dissemination.
- Completed Air Force Basic Military Training and an eight-month cyber intelligence technical training pipeline — structured curriculum with formal lesson plans, testing, and progression standards.

Shop Laborer | Western Smelting & Metals | Dallas, OR | **January 2026 – Present**

- Sort and grade material against defined quality standards; record classifications accurately for inventory and production tracking.
- Monitor equipment performance and report discrepancies promptly to maintain continuous operations.

Carpenter Apprentice | Anderson Construction | Portland, OR | **January 2024 – December 2024**

- Worked from blueprints and written specifications to complete tasks to exact requirements.
- Coordinated with crew members to sequence work and meet project deadlines.
